Comments for improving the graduate's capacity development of the syllabus:

There should be new subjects and topics not the same ones that have already been taught in the third year.

Suggestions for overall improvement of the course:

Since it is a self financing course the teachers should be more experienced. New teachers and changing teachers make the subjects even more confusing. The course itself is too intensive and attention is paid more to attendance rather than the potential of the student. All that matters is that there should be 100% attendance for which students are more appreciated rather than the work and efforts they put in. It is better to be a helping hand to students rather than being biased by their religion and troubling them for attendance even when they have the potential to score much higher if paid attention to by the teachers.
